Robert,

Per Caryn's suggestion, I do think I will attend the next meeting. Can you please remind me when that is? Thanks!

Yes, I think the timing is good -- and thank you for the article

Caryn,

Attached, FYI, is an article on EPA's public participation program that Eric and I have submitted for publication and is in peer review. Julie D. had provided some comments as well, but the EPA process to get her added as author was too much.

I hope to meet with Robert next week on several sites and then will follow up on CFAC. What do you think if I came to the next public meeting as an audience member? Is it time?
